Exploring Wildlife Conservation in South Africa

Approx. dates: July 28 – Aug. 18, 2026; Southern African Wildlife College and Kruger National Park

Join us for an instructor-led course in the South African savanna, where wildlife struggles to survive in a rapidly changing world, conservationists race to stay one step ahead of poachers, and local communities adapt and innovate to support both people and wildlife. Meet and learn from various heroes in wildlife conservation, get hands-on experience with wildlife, and see traditional and cutting-edge strategies to study and protect South Africa's wildlife.

Are you ready to launch your career saving wildlife? Come work alongside vets and scientists to help save some of the world's most incredible but threatened wildlife.

Activities include:

- Capture and dehorn wild rhinos
- Bushwalks and camera trap setup
- Game drives and wildlife viewing
- Band wild birds and collect scientific data
- Multi-day camping trip through **Kruger National Park**
- Explore local school and community
- See anti-poaching dogs in action
- Meet rangers, wildlife vets, scientists, and rhino poaching investigator
- Earn six credits for **Fisheries and Wildlife** or **Lyman Briggs College**
